

IN THE SPECIFICATION (SUBSTITUTE)

Amend the specification as follows:

Page 4, paragraph [0016]:

[0016] The unvulcanized rubber 5 precisely formed in [[a]] sheet form by calender rollers and the like is used as an outer layer ~~a substrate~~ for the belt. The rubber layer is later vulcanized to a seamless resin sheet. Since the vulcanized rubber belt bears smooth surfaces attributed to the forming method, the belt is employable without polishing, since the ~~and a~~ dispersion value in the thickness of the rubber 5 sheet belt can be kept less than 0.04 mm ~~0.4mm~~.
